

Training course:

EMS & Health and Safety Internal Auditor

Who it is for...

This training course is for those who wish to enhance their internal auditing skills with a view to adding value to the business and demonstrate environmental and/or occupational health and safety performance and compliance. This training course will also include the new requirements included in **ISO 14001:2015 and OHSAS 18001:2007**.

You need this course if...

- You are required to undertake internal EMS and/or OH&S audits

Duration and requirements...

- 2 consecutive days (which includes an examination)
- Start time: 8:45am for a 9am start. End time: 5pm
- Attendance and participation of the full course is required

You will learn...

- the internal audit requirements of an EMS and an OH&S management system
- how to plan your audits by developing effective checklists
- how to verify that current practice in your organisation conforms with your own defined requirements
- to gather objective evidence through observation, interviewing and sampling of documentation
- how to report findings accurately
- that auditing for conformity can improve the stability and robustness of management systems
- what corrective action is and who is responsible for taking action
- how to follow up and verify the effectiveness of corrective action taken

You will need...

- a basic understanding of environmental and/or occupational health & safety requirements

Please refer to the 'Training' page on our website for scheduled dates and venues. We can also undertake in-company training courses (minimum delegate numbers apply).

Delegate rate:

- Non-residential: £395 + VAT
- Residential: £495 + VAT (typically on-site and includes B&B between days 1 and 2)
